

## Product Code: STC005LTR

Product description: Plastic bottle/Screw top  
Single Bottle: 5.16kg size: 286x180x130mm

2 Bottles (inc box) 13.0kg size 305x220x295mm

### Product description

STERI-7 Concentrate is formulated to be diluted and dispensed into trigger spray bottles or buckets for high volume cleaning solutions. STERI-7 concentrate is non-foaming which makes it ideal in cleaning and scrubbing machines. This also represents the most economical way to purchase.

### Product over view

STERI-7 is a high level, broad spectrum biocidal cleaner, proven in extensive laboratory tests to kill the most life threatening pathogens, this includes MRSA and Clostridium Difficile Spores, E.Coli and Salmonella.

Once dry it remains on the surface and reactivates in the presence of any moisture or a simple wipe of a damp cloth, to kill any pathogens subsequently introduced. This is due to a unique innovation known as Reactive Barrier Technology (RBT).

Developed for use on hard surfaces, soft metals and textiles such as worktops, floors, walls, doors, sinks and food preparation areas, it's also been used successfully in fogging machines and hot water extraction machines for the cleaning of carpets and curtains.

STERI-7 kills pathogens 99.9999%

at the point of application and continues to protect surfaces between cleans.

### Risk assessment

Upon review of previously cited literature and actual tests results, there is little probability that STERI-7 would cause an unexpected biological reaction during use as a surface disinfectant. This includes biological reactions such as acute toxicity and localised tissue toxicity.

At this time, no further testing is deemed necessary with respect to the biosafety of STERI-7. See NAMSA Laboratories risk report.

#### Technical information

Active Ingredients: Alkyl Dimethyl Benzyl Ammonium Chloride  
5-chloro-2-methyl-2 H -isothiazol-3-one [EC No 247-500-7] and  
2-methyl-2 H -isothiazol-3-one [EC No 220-239-6]

Bacteria Ps.aeruginosa 15 secs  
MRSA 30 secs  
Vancomycin-Resistant Enterococcus (VRE) 5 mins  
Ent.hirae 1 min  
Staph.aureus 1 min  
E.coli 30 secs  
Salmonella typhimurium 30 secs  
Salmonella enteritidis 5 mins  
Salmonella cholerae suis 5 mins  
Proteus Vulgaris 5 mins  
Legionella 5 mins  
Listeria Mono 30 secs  
Mycobacterium Mycobacterium terrae 30 mins  
Mycobacterium Fortuitum 5 mins  
Spores Bacillus subtilis 30 mins  
Bacillus cereus 30 mins  
Clostridium difficile 2 mins  
Clostridium perfringens 5 mins  
Yeasts Candida albicans 15 mins  
Fungi Aspergillus niger 15 mins  
Viruses SARS 5 mins  
Hep C 5 mins  
Influenza A 5 mins  
HIV 5 mins  
Contact kill times

Conforms to  
BS EN 1040, 1276, 1650, 13623, 13697, 13704, 13727 1404,  
14347,14348,14349.  
QCT -1, -2, -2-M. ISO 10993 certified. ASTM E1052(2002)  
Defra General orders. Air Canada Test Protocol.

#### KEY BENEFITS:

Kills: Bacteria, Viruses, Spores  
including Clostridium Difficile, Mycobacterium,  
Fungi, Yeasts.

Reactive Barrier Technology (RBT) keeps on  
killing effectively between cleans.

Independently tested and verified.

Can reduce cleaning time by at least 33%.

No rinsing required (Just leave to dry).

Fast acting.

Multipurpose usage.

Non-foaming.

Non-toxic (See risk report).

Non-Irritant (ISO 10993).

Non-corrosive (AMS1451 A&B).

Non-Ethanol based.

Non-Chlorine based.

Classed as non-hazardous to the environment.

Food Safe.

FULLY COMPLIANT WITH THE EUROPEAN BIOCIDALE DIRECTIVE
