

Product Code: ST775MLTR

Product description: Plastic bottle/Spray Head

Single Bottle: 811g size: 273x100x70mm

6 Bottles (inc box) 4.95kg size 275x342x153mm

Product description

Ready To Use is quick and convenient. You simply spray and wipe thoroughly clean then leave to dry. This makes it perfect for regular use and food preparations areas.

Product overview

STERI-7 is a high level, broad spectrum biocidal cleaner, proven in extensive laboratory tests to kill the most life threatening pathogens, this includes MRSA and Clostridium Difficile Spores, E.Coli and Salmonella. Once dry it remains on the surface and reactivates in the presence of any moisture or a simple wipe of a damp cloth, to kill any pathogens subsequently introduced. This is due to a unique innovation known as Reactive Barrier Technology (RBT).

Developed for use on hard surfaces, soft metals and textiles such as worktops, floors, walls, doors, and sinks and food preparations areas.

STERI-7 kills pathogens 99.9999%

at the point of application and

continues to protect surfaces

between cleans.

Risk assessment

Upon review of previously cited literature and actual tests results, there is little probability that STERI-7 would cause an unexpected biological reaction during use as a surface disinfectant. This includes biological reactions such as acute toxicity and localised tissue toxicity.

At this time, no further testing is deemed necessary with respect to the biosafety of STERI-7. See NAMSA Laboratories risk report.

Technical information

Active Ingredients: Alkyl Dimethyl Benzyl Ammonium Chloride

5-chloro-2-methyl-2 H -isothiazol-3-one [EC No 247-500-7] and
2-methyl-2 H -isothiazol-3-one [EC No 220-239-6]

Contact kill times:

Bacteria Ps.aeruginosa 15 secs
MRSA 30 secs
Vancomycin-Resistant Enterococcus (VRE) 5 mins
Ent.hirae 1 min
Staph.aureus 1 min
E.coli 30 secs
Salmonella typhimurium 30 secs
Salmonella enteritidis 5 mins
Salmonella cholerae suis 5 mins
Proteus Vulgaris 5 mins
Legionella 5 mins
Listeria Mono 30 secs
Mycobacterium Mycobacterium terrae 30 mins
Mycobacterium Fortuitum 5 mins
Spores Bacillus subtilis 30 mins
Bacillus cereus 30 mins
Clostridium difficile 2 mins
Clostridium perfringens 5 mins
Yeasts Candida albicans 15 mins
Fungi Aspergillus niger 15 mins
Viruses SARS 5 mins
Hep C 5 mins
Influenza A 5 mins
HIV 5 mins

Conforms to

BS EN 1040, 1276, 1650, 13623, 13697, 13704, 13727 1404,
14347,14348,14349.

QCT -1, -2, -2-M. ISO 10993 certified. ASTM E1052(2002)

Defra General orders. Air Canada Test Protocol.

KEY BENEFITS:

Kills: Bacteria, Viruses, Spores
including Clostridium Difficile, Mycobacterium,
Fungi, Yeasts.

Reactive Barrier Technology (RBT) keeps on
killing effectively between cleans.

Independently tested and verified.

Can reduce cleaning time by at least 33%.

No rinsing required (Just leave to dry).

Fast acting.

Multipurpose usage.

Non-foaming.

Non-toxic (See risk report).

Non-Irritant (ISO 10993).

Non-corrosive (AMS1451 A&B).

Non-Ethanol based.

Non-Chlorine based.

Classed as non hazardous to the environment.

Food Safe.

FULLY COMPLIANT WITH THE EUROPEAN BIOCIDALE DIRECTIVE
